TANYX **TM**
MEASUREMENTS, inc

CAL Controls

A **DANAHER** Company

Temperature Controllers
Operator Interface Panels
System Software

CARLO GAVAZZI

Contactors & Motor Starters
Solid State Relays
AC Monitor Relays (V-I-W)

Honeywell

Pressure Transducers
Position Transducers
Load Cells

WEST/PMA

A **DANAHER** Company

Multi-Loop Controllers
Process Control Systems
Various Bus Protocols

FUJI ELECTRIC

Process Controllers
Flow Meters
Solid Block Heaters

CONVECTRONICS

Thermocouples
Resistance Temp Detectors
Air Heaters

PARTLOW

A **DANAHER** Company

"Paperless" Recorders
Strip Chart Recorders
Circular Chart Controllers

PHASETRONICS

SCR Power Controllers Motor
Starters
Variable Speed Drivers

NK Technologies

Current Transducers
Current Switches
Ground Fault Detectors

UNITRONICS

HMI Graphic Panels
Integral Control & PLC
Complimentary Software

DATAFORTH

Sensor Transmitters
Signal Conditioners
Signal Isolators

LAUREL

Digital Setpoint Meters
Encoder / Timing Counters
Remote Displays

PRODUCT LINE CARD

Sophisticated Products for Machine Automation
www.tanyx.com

CONTROLLERS

Single-loop, discrete, 3-mode electronic controllers in all DIN Sizes · temperature sensor and electrical signal inputs · multiple control/alarm outputs · RS232 or RS485 bi-directional communications, Windows feel monitoring & control software available.

SENSORS

Thermocouples · RTDs · phase sequence/loss · under/over current and voltage · position · level · flow · inductive and capacitive and ultrasonic proximity · photo-electric

TRANSDUCERS

Pressure · Position · Flow · Temperature · AC & DC and voltage and current power.

METERS

Analog – Digital – Bargraph – Electric Power ... all are available with RS232 / RS485 Communications

POWER HANDLING DEVICES

Solid-State Relays · SCR Power Controls · AC & DC Contactors · Electro-mechanical relays · Motor Starters and Variable Frequency Drives.

MONITOR RELAYS

Measure the applied signal for Over / Under Voltage ; Over / Under Current ; Phase Loss / Sequence / Assymetry ; Over / Under Frequency ; Over / Under Power. When the measured parameter is outside the user set tolerance, a relay contact output actuates

RECORDERS

Strip chart · Circular · Electronic (paperless) · multi-channel, multi-color, with communications.

TIMERS & COUNTERS

Analog & digital · electronic and electro-mechanical · dual input, quadrature and rate · control outputs.

ENERGY MANAGEMENT

Power monitors and analyzers · electric parameter transducers · protector relays · phase monitors · over / under voltage and current relays · motor starters and speed control · "inverters."
